▶ Flappy Bird proposal Form

○ SUPERVISED BY: DR. SARA EL-METWALLY

Created by:

- Yasmin Hassan Elbasiony
- Mohamed Khaled Mehissn
- Mohamed Sobhy Abdel-maksoud

The idea:

- Flappy bird

Description of project:

this game is about how to fly with a small bird trying to avoid collisin. passing through each obstacle-gap and trying not to fall by the gravity. And the player loses when he hits a barrier or falls.

Methodology of project

- We use an optimized neural network algorithm with a genetic algorithm to create an automated flappy bird game

Used technology :

- Language: python , pygame

THANK YOU!
